SUMMARY

I am a passionate backend developer with extensive experience in PHP and Laravel, actively seeking to advance my career by expanding my expertise into Java backend programming. Over the years, I have developed a strong foundation in backend development, specializing in designing and implementing scalable, high-performance APIs, managing databases, and architecting robust systems tailored to client needs.

I have a proven track record of collaborating effectively with UX/UI designers, QA testers, and cross-functional teams to translate complex project requirements into innovative solutions. My experience includes working directly with clients, ensuring alignment with business goals, and delivering customized, scalable applications.

Eager to embrace continuous learning, I am committed to enhancing my technical repertoire, particularly in Java, and contributing to forward-thinking projects that drive growth and innovation.

EDUCATION

ITI (Information Technology Institute MCIT) Mansoura branch graduate **March 2022 – August 2022**

Bachelor Degree In Computer Science – Faculty of Computers **Sep 2016 – August 2020**
and Informatics , Suez Chanal University

WORK EXPERIENCE

Full-Time Backend Developer (PHP and Laravel) Jadaraa

Present – August 2023

- **Developed and maintained backend systems using PHP and Laravel.**
- **Collaborated with cross-functional teams, including UX/UI designers and testers, to deliver high-quality software solutions.**
- **Designed and implemented APIs and managed databases to support various applications.**
- **Engaged in client meetings to understand requirements and provide tailored solutions.**

Proficient in JavaScript , jquery and HTML.

Solid understanding of Object-Oriented Programming (OOP), data structures, algorithms, Design pattern , and SOLID principles.

Experienced in integrating and working with RESTful APIs.

Hands-on experience with Livewire, Alpine.js, and Filament.

PROJECTS

Personal Trainer App

<https://web.trainer.site.jadara.work/>

Built an app for trainers to offer services, with package options, coupons, and subscriptions. Features include SMS and Firebase notifications, video uploads, and a review system to enhance user experience and engagement.

Nava Mobile Application with admin dashboard

<https://nava.site.jadara.work/>

Developed a jewelry order management dashboard with multi-role access to handle manufacturing, repair, purchase, and custom orders. Features include order tracking via mobile app, Firebase notifications, email updates, and Laravel cron jobs for automated tasks. Provides detailed order statistics and supports role-based permissions for efficient order handling and delivery. salla integration .

Alsaedan Web Site

<https://www.alsaedan.com/>

Created a real estate platform for buying and renting land or flats, featuring advanced search filters by city, compound, floor number, and rooms. Integrated with Moyasar for secure payments, with email notifications to enhance user experience and keep users informed.

Retaam Web Site

<https://www.retaam.com/>

Developed an e-commerce platform for electronics with a dashboard to manage orders, carts, and customer interactions. Features include real-time chat for customer support and an intuitive order management system for efficient processing.

NSK Web Site

<https://nsk.site.jadara.work/>

The NSK platform provides comprehensive services for workforce recruitment, management, and general contracting. It specializes in tailored HR solutions, maintenance, operations, and skilled labor leasing for various sectors across Saudi Arabia. With over a decade of experience, NSK focuses on delivering high-quality labor solutions and streamlining processes for clients in multiple industries

Rakayb Api and Dashboard

https://rakayb.site.jadara.work

Developed a package management platform for coordinating deliveries between users and airports. Key features include email notifications for order status, tracking for delays, scanned signatures for confirmation, secure payment processing, and a review system for user feedback. This ensures efficient and transparent order handling

Leqaa Api and Dashboard

https://liqaa.site.jadara.work

Created a platform utilizing personality tests to find ideal marriage matches based on compatibility percentages. Features include real-time chat via Firestore, Livewire, push notifications, and a user-friendly system for favoriting or blocking profiles. The app also supports secure payments and subscription options for enhanced user experience.

Note all this project build with php and laravel
